DETAILED ACTION

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-4, 9-11, and 13-16 are rejected under 35 U.S.C. 102(b) as being anticipated by Bartholomaeus. Note column 5, lines 3-6 of Bartholomaeus. As shown in the figures of Bartholomaeus, there is a leakage path from the pressure connector P to the working connector A of Bartholomaeus in the non-regulating position due to leakage from the working connector A to the tank connector T in the non-regulating position shown in the drawings. Regarding claims 3, 9, and 11, conduit 11 of Bartholomaeus is read as a portion of the "leakage passages". Regarding claim 10, conduit 9 of Bartholomaeus is read as a portion of the "leakage passages". Regarding claim 14, the circumferential passages connected to the axial passage 19 of Bartholomaeus are read as a portion of the "leakage passages".

3. Claims 5-8 and 12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.
